# STATISTICAL REPORT

## of Seventh-day Adventist Conferences, Missions, and Institutions Year Ending December 31, 1943. The Eighty-First Annual Report

BECAUSE of unsettled world conditions during 1943, it has been possible to secure only partial reports of the progress of Seventh-day Adventist work from large sections of the world field. No contacts whatever have been maintained with several entire divisions of the General Conference territory. In compiling statistical data, therefore, it has been necessary in some cases to repeat figures used in previous years' reports.

In a few instances, fragmentary information has been received, and, when consistent, this has been incorporated into the summaries of church memberships, funds, and other data. Where it has been necessary to rely altogether on earlier reports, as in the case of Central Europe, the Far East, etc., the latest reported year's figures have been repeated in their entirety as to the number of churches, memberships, number of baptisms, number of workers, tithes, offerings, etc. During periods when no new data is coming in, this procedure serves in part to maintain the world summaries at a consistent level, except that it does not indicate membership growth in the fields so reported.

The table immediately following lists for the different Division fields the latest available Seventh-day Adventist church memberships. Other tabulations show annual reported increases in world membership, numbers of organizations, churches, etc.

### LABORERS

Because of a lack of uniformity in reporting the number of workers employed in some parts of the field, it has been necessary to secure from the lists of workers published in the annual *Year-book*, the numbers of laborers engaged in the North American territory. An effort has also been made to eliminate duplications in the reports by conferences, of workers who hold credentials and licenses while serving in institutional activities.

Following is a summary of the several classes of workers in the North American Division and in the world field:

#### Laborers in North America

	Total Workers Reported by Conferences	Institutional Workers Holding Credentials	Evangelistic Workers
Ordained Ministers	1,336	155	1,181
Licensed Ministers	864	172	692

### FOOTNOTES—TABLE 2, SECTION 3, EDUCATIONAL INSTITUTIONS

(a) The system of educational work outlined by the Educational Department of the General Conference in 1906, comprising sixteen grades or years of study, is arranged as follows: Elementary church schools (information concerning which will be found listed under columns 24 to 28 in Table 1), grades 1-8; intermediate schools, grades 7-10; academies or secondary schools, grades 9-12; colleges, grades 13-16. In schools outside of North America this classification of grades cannot be fully followed owing to differences in educational systems and because training standards are not uniform in all localities.

The College of Medical Evangelists gives a four-year medical course based on three years of college work; and the Seventh-day Adventist Theological Seminary offers one year of graduate class study above the regular college degree courses.

Part 2 of Section 3—Intermediate schools—includes some schools doing eleven grades of work and even a few carrying classes in the twelfth grade, but which are not organized as regular academies. Schools with less than ten pupils above the eighth grade are not generally listed, but the number of secondary students in intermediate schools not shown in the detailed report is given in the total designated, "Students Above Eighth Grade in Elementary Schools." Only pupils above the eighth grade are considered secondary students.

Information here shown for buildings and school facilities, student capacity and enrollment, and the number of teachers and other employees, is given as of about February, 1944, after the opening of the second semester of the school year. The number of graduates and students entering denominational work are for the school year ending in May or June, 1943.

(b) The "capacity" of schools is the number of students that may be accommodated in classes, and does not refer to dormitory or boarding space provided. Buildings and student capacity of academies connected with colleges are included in the college figures.

(c) The number of teachers in elementary schools connected with colleges and secondary schools is included with other church school teachers in Table 1, column 25, and is not counted in the totals of teachers in Section

3 except where the teacher groups cannot be divided in schools outside of North America.

(d) The grades taught in each school indicate the kind of work undertaken, as outlined in note (a). In North America intermediate schools generally are noted as teaching grades 1-10 or 1-11.

(e) In the column indicating laboratory facilities the word "No" occurs where the schools have none; the word "Yes" is used in connection with schools having such facilities. These facilities cover one or more lines of work in various schools as follows: Astronomy, chemistry, physics, histology, zoology.

Schools having facilities for manual training are indicated by "Yes" in corresponding column; those not having such facilities are listed with "No" opposite. These facilities include one or more of the following: Carpentry, cooking, farming, dairying, nursing, printing, plumbing, horticulture, dress-making, tent-making, broom-making, brick making, etc.

(f) Column 15 shows the total number of graduates in finishing courses in the academies and colleges. In schools other than some training schools for workers outside of North America no graduates are counted below the twelfth grade. Graduates are for the school year ending in May or June, 1943.

(g) Column 19 gives the number of students (not graduates alone) reported as entering some regular line of denominational work. Student corps members selling literature during the vacation period, and persons
