STATISTICAL REPORT

of Seventh-day Adventist Conferences, Missions, and Institutions in World Field

For the Year Ending December 31, 1948

Under the Lord's blessing, Seventh-day Adventist interests have made substantial advancement in 1948. The church membership in all the world at the close of the year was 672,658, an increase of 44,064 members over 1947. This is the largest annual growth ever recorded, and was an average of 70 new members for every 1,000 on the church rolls at the beginning of the year. A large proportion of these new adherents, 36,783, or 92 for each 1,000 members, were in overseas territory.

Church funds, including tithe, mission offerings and contributions for home and local purposes of \$42,034,536.78 in 1948 were \$3,056,040.22 more than in 1947, or a yearly average of \$62.49 of all funds for each church member. The major part of the added tithes and offerings was in North America. While in most overseas fields substantial gains were also recorded in the local currencies of the countries, yet because of the lowering of the exchange rates, in many cases, the amounts show actually less than in the previous year when converted into United States dollars in which this report is given.

The tabulations which follow make comparisons over a period of years of church memberships, tithes and contributed funds, and departmental and institutional activities. Tables are given listing detailed information from conferences and missions throughout the world; educational, medical and publishing progress; the countries where Seventh-day Adventist work is conducted, and the languages in which publications are issued. Summaries show the growth of the church's major activities since the organization of the General Conference in 1863.

FOOTNOTES—TABLE 2, SECTION 1. EDUCATIONAL INSTITUTIONS

(a) The system of educational work outlined by the Educational Department of the General Conference in 1906, comprising sixteen grades or years of study, is arranged as follows: Elementary church schools (information concerning which will be found listed under columns 24 to 28 in Table 1), grades 1-8; intermediate schools, grades 7-10; academies or secondary schools, grades 9-12; colleges, grades 13-16. In schools outside of North America this classification of grades cannot be fully followed owing to differences in educational systems and because training standards are not uniform in all localities.

The College of Medical Evangelists gives a four-year medical course based on a minimum of three years of college work; and the Seventh-day Adventist Theological Seminary offers two and one-half years of graduate class study above the regular college degree courses.

Part 2 of Section 1—Intermediate Schools—includes some schools doing eleven grades of work and even a few carrying classes in the twelfth grade, but which are not organized as regular academies. Schools with less than ten pupils above the eighth grade are not generally listed, but the number of secondary students in intermediate schools not shown in the detailed report is given in the total designated, "Pupils above eighth grade in Elementary Schools." Only pupils above the eighth grade are considered secondary students.

Information here shown for buildings and school facilities, student capacity and enrollment, and the number of teachers and other employees, is given as of about February, 1948, after the opening of the second semester of the school year. The number of graduates and students entering denominational work are for the school year ending in May or June, 1947.

(b) The "capacity" of schools is the number of students that may be accommodated in classes, and does not refer to dormitory or boarding space provided. Buildings and student capacity of academies connected with colleges are included in the college figures.

(c) The number of pupils in Grades 1-8 in elementary schools connected with colleges, academies and intermediate schools is included in Column 26 of Table 1, and is shown here only for information, and not to be counted again.

The number of teachers in elementary schools connected with colleges and secondary schools is included with other church school teachers in Table 1, column 25, and is not counted in the totals of teachers in Section

3 except where the teacher groups cannot be divided in schools outside of North America, and for these the estimated number of elementary teachers is subtracted from the total.

(d) The grades taught in each school indicate the kind of work undertaken, as outlined in note (a). In North America intermediate schools generally are noted as teaching grades 1-10 or 1-11.

(e) In the column indicating laboratory facilities the word "No" occurs where the schools have none; the word "Yes" is used in connection with schools having such facilities. These facilities cover one or more lines of work in various schools as follows: Astronomy, chemistry, physics, histology, zoology.

Schools having facilities for manual training are indicated by "Yes" in corresponding column; those not having such facilities are listed with "No" opposite. These facilities include one or more of the following: Carpentry, cooking, farming, dairying, nursing, printing, plumbing, horticulture, dress-making, tent-making, broom-making, brick-making, etc.

(f) Column 15 shows the total number of graduates in finishing courses in the academies and colleges. In schools other than some training schools for workers outside of North America no graduates are counted below the twelfth grade. Graduates are for the school year ending in May or June, 1947.

(g) Column 19 gives the number of students (not graduates alone) reported as entering some regular line of denominational work. Student colporteurs selling literature during the vacation period, and persons continuing training in nurses' or medical courses are not considered as definitely entering denominational service at that time.

(h) In 1948 the College of Medical Evangelists graduated 85 students from the medical course, seven from the dietetics course, and 30 from technicians courses. The Seventh-day Adventist Theological Seminary conferred 22 master's degrees.

(i) A number of students taking classes with the Home Study Institute are also enrolled in regular colleges and academies, and the most of the students studying with the Home Study Institute are carrying only one or two classes each. The Home Study Institute reports 21 instructors doing some teaching for them in 1948 who are connected with other educational institutions, and 8 other class helpers who are not considered regular teachers, besides the listed faculty members and office staff.

COUNTRIES, ISLANDS, AND ISLAND GROUPS IN WHICH SEVENTH-DAY ADVENTIST WORK HAS BEEN ESTABLISHED

The work of Seventh-day Adventists is being carried on in nearly all of the principal countries of the world, and in many of the smaller geographical divisions. It is generally considered that a country or political section has been entered by Seventh-day Adventist interests when regular medical, educational, or other mission activities are being conducted among the people of that particular area, or when there is in the territory one or more groups of persons connected in an organized way with the denomination, such as in Sabbath school or church fellowship. A new field is not considered as entered when only itinerant preaching or colporteur work has been done, or when there are only a few scattered believers.

Recognizing the need of a reliable list of political and geographical divisions which could be used as a basis for checking the different areas in which Seventh-day Adventist work is being carried forward, the following action was taken at the 1946 General Conference session :

"Voted, That the designations of the several sections of the world field in which Seventh-day Adventists are conducting their work be based on the list of countries, islands, and island groups in such authoritative works as the *World Almanac* and the *Statesman's Yearbook*."

Following this procedure, the list shown below comprises the political and geographical divisions given in the *World Almanac* and the *Statesman's Yearbook* with the exception of the individual states of the United States of America, and the several continental provinces of Canada, Australia, the Union of South Africa, former British India, and Germany. The list also includes principal island groups of the Pacific Ocean.

With world conditions as unsettled as at this time, it is not unlikely that political changes may render difficult the maintaining of stable lists of countries for checking purposes. Furthermore, there may be other standard catalogs of countries which should be consulted in addition to those mentioned above. The editors of the STATISTICAL REPORT will welcome any corrections or additions to the lists here presented, substantiated by authoritative sources of information.

Paralleling the standard list of political and geographical areas shown below, there are given the names of the countries, islands, and island groups in which Seventh-day Adventist work is being conducted at the present time, as far as they have been recorded in the General Conference office. This list also is subject to correction by those who are intimately acquainted with conditions in the various sections of the world field; and the list will be extended as new mission territories are entered.

Political and geographic sections of the world as given in the *WORLD ALMANAC* and the *STATESMAN'S YEARBOOK*. Countries and geographic areas in which Seventh-day Adventist work is being done.
